SUMMARY

Backend engineer building scalable, secure REST APIs and cloud-native microservices in Java and Spring Boot, with two live production systems serving 1,400+ users combined at 99.93% uptime. Delivers full-stack ownership on production platforms, directing Claude Code through Agentic AI workflows to build React frontends end to end. Drives engineering standards through 87% unit-test coverage, JWT and RBAC security, and automated CI/CD.

EDUCATION

B.Tech in Computer Science and Engineering

Gandhi Institute of Technology and Management, Visakhapatnam

Jul 2023 - May 2027

CGPA: 8.98/10

PROJECTS

ProStriver | Student Productivity Platform

Jan 2026

Java 21, Spring Boot, Apache Kafka, Redis, PostgreSQL, MongoDB, Docker, AWS EC2, Prometheus, Grafana [Live](#) | [GitHub](#)

- Owned end-to-end delivery of a production REST API platform for 220+ users as a multi-module Maven project, running one Docker image as an AWS EC2 API node and a DigitalOcean worker via Spring profiles in a dual-cloud, cloud-native setup.
- Built an asynchronous Kafka pipeline that offloads 40-50 second Gemini LLM generation from the request path, cutting response to a 253 ms acknowledgment, with consumer groups, keyed ordering, idempotency, and dead-letter handling.
- Secured the platform with stateless JWT authentication, rotating refresh tokens, RBAC, and Bucket4j rate limiting, and hardened performance with Redis caching that cut latency from 342 ms to 90 ms at a 92.5% hit ratio.
- Directed Claude Code to write and validate the production test suite, paired with a GitHub Actions CI/CD pipeline that builds, containerizes, and deploys over SSH at 99.93% uptime, monitored through Prometheus and Grafana.

GITAM Aero Astro Club Platform | Full-Stack Platform

Jul 2025

Java, Spring Boot, Spring Security, JWT, PostgreSQL, React

[Live](#) | [Frontend](#) | [Backend](#)

- Architected and deployed the Spring Boot backend for the official club platform, serving 1,200+ students with 40+ secure REST APIs, JWT authentication, and role-based access control.
- Automated recruitment workflows and email alerts, cutting manual admin effort by 70% while sustaining 99.78% uptime.
- Built the React frontend using an Agentic AI workflow, directing Claude Code to develop and validate every component.

WORK EXPERIENCE

Landmine Soft, Remote

Apr 2026 - May 2026

Software Engineer Intern

[Certificate](#)

- Built 10+ REST APIs in Java and Spring Boot within a cross-functional team, owning design through debugging.
- Built end-to-end authentication and authorization using Spring Security and JWT with access and refresh token flows, plus role-based access control across 3 roles.
- Achieved 87% JUnit test coverage and full Swagger/OpenAPI documentation, cutting integration errors.

SKILLS

Backend & Frameworks: Spring Boot, Spring Security (JWT, OAuth 2.0, RBAC), Spring Data JPA / Hibernate, REST API design, microservices, JUnit

AI-Native & Agentic: AI-native development workflows, Claude Code, Spring AI, RAG (pgvector), structured LLM output

Front-End: HTML, CSS, JavaScript, React

Databases & Distributed Systems: PostgreSQL, MySQL, MongoDB, Apache Kafka, Redis, asynchronous processing

Cloud-Native & DevOps: AWS (EC2, S3, Lambda, IAM), Docker, GitHub Actions CI/CD, Git

Languages & Core CS: Java, SQL, Python (basic), DSA, OS, Computer Networks, DBMS, OOP, System Design

LEADERSHIP & ACHIEVEMENTS

- Vice President, AWS Cloud Club GITAM (Nov 2025 - Present): lead a 60+ member community, growing active participation 20% via AWS Jam sessions and peer-led builds.
- #1 overall in Meta Developer Communities' 5-round DSA series, GITAM chapter.
- [LeetCode](#) 1722 rating, 550+ problems solved.
