## EDUCATION

### GITAM University

*Bachelor of Technology in Computer Science Engineering – GPA: 8.9/10*

Visakhapatnam, AP

*Jul 2023 – May 2027*

## TECHNICAL SKILLS

**Languages:** Java, Python, JavaScript, SQL

**Backend & Frameworks:** Spring Boot, Spring Security, JPA, JUnit, Maven, Docker

**Cloud & DevOps:** AWS (EC2, S3, Lambda, IAM), GitHub Actions, CI/CD, Linux, Git

**Databases:** PostgreSQL, MySQL, MongoDB

**Concepts:** Data Structures & Algorithms, OOP, Microservices, API Design, Scalability, Agile

## EXPERIENCE

### Software Engineer Intern

Remote

*Landmine Soft (MSME-Recognized Startup) | [Certificate](#)*

*Jan 2026 – Feb 2026*

- Designed and developed a scalable backend for a College Student Portal, modeling a PostgreSQL schema with 11 entities and implementing 30+ RESTful APIs across enrollment, attendance, and academic modules.
- Engineered secure authentication and authorization using Spring Security with JWT and RBAC (3 roles), ensuring protected access to all endpoints and documented APIs using Swagger/OpenAPI.
- Improved code reliability and deployment efficiency by writing unit tests (JUnit) achieving 80%+ coverage, and setting up automated CI/CD pipelines via GitHub Actions for seamless deployment.

### Vice President

Visakhapatnam, AP

*AWS Cloud Club, GITAM University*

*Oct 2025 – Present*

- Led a 4-member dev team to build and ship [ProStriver](#) | [GitHub](#), a student productivity platform with OTP-based JWT auth, spaced-repetition engine, automated email digests via Brevo API, and integrated Gemini API to generate personalized study plans. Onboarded 220+ users.
- Deployed ProStriver using a dual-server architecture (Spring Boot API on AWS EC2 and 5 background jobs on DigitalOcean) with GitHub Actions CI/CD enabling automatic deployment on every push to main.
- Elected Vice President of a 60+ member cloud community, leading AWS initiatives, mentoring members and students on cloud architecture, and increasing active participation by 20% through hands-on AWS Jam sessions and peer-led project builds.

## PROJECTS

### AI-Powered Crop Yield Prediction | *Spring Boot, FastAPI, Scikit-learn, MySQL, React* | [GitHub](#) | [Demo](#) Sep 2025

- Built the backend for SIH 2025 (6-member team) integrating a FastAPI ML microservice via RestTemplate for real-time yield predictions across 50+ crop types with 87% accuracy.
- Implemented autocomplete search with JPQL queries and a top-N recommendation engine ranked by predicted yield. Achieved sub-second API response times.

### GITAM Aero Astro Club Platform | *Spring Boot, JWT, PostgreSQL, Spring Security* | [Live](#) | [GitHub](#) Jul 2024

- Delivered 30+ secure RESTful APIs with JWT auth for the official club platform serving 2,000+ students.
- Designed and implemented an admin dashboard enabling user management, role-based access control, and real-time metrics, along with an end-to-end recruitment pipeline, reducing manual admin effort by 70% while maintaining 96% uptime

## ACHIEVEMENTS

[Top Performer – Meta Code Quest](#) – Ranked #1 across 5 weekly DSA hackathons, Meta Developer Communities  
[Google Cloud Study Jams – Gold League](#) – 52 skill badges, 48,985 XP across Google Cloud  
[Build Real-World AI Applications with Gemini](#) – Google
