EDUCATION

GITAM University

Bachelor of Technology in Computer Science Engineering – GPA: 8.9/10

Visakhapatnam, AP

Jul 2023 – May 2027

TECHNICAL SKILLS

Languages: Java, Python, JavaScript, SQL

Backend & Frameworks: Spring Boot, Spring Security, JPA, JUnit, Maven, Docker

Cloud & DevOps: AWS (EC2, S3, Lambda, IAM), GitHub Actions, CI/CD, Linux, Git

Databases: PostgreSQL, MySQL, MongoDB

Concepts: Data Structures & Algorithms, OOP, Microservices, API Design, Scalability, Agile

EXPERIENCE

Software Engineer Intern

Landmine Soft | [Certificate](#)

Remote

April 2026 – May 2026

- Designed and developed 30+ production-grade RESTful APIs using Java and Spring Boot, collaborating with a cross-functional engineering team to deliver core backend functionality.
- Engineered JWT-based authentication and role-based authorization using Spring Security with access and refresh token workflows, enabling secure multi-role access control across all REST APIs.
- Wrote comprehensive unit tests using JUnit achieving 80%+ code coverage, and documented all APIs using Swagger/OpenAPI. Enabling faster code reviews and reducing integration overhead.

Vice President

AWS Cloud Club, GITAM University

Visakhapatnam, AP

Oct 2025 – Present

- Led a 4-member dev team to build and ship [ProStriver](#) | [GitHub](#), a student productivity platform with OTP-based JWT auth, spaced-repetition engine, automated email digests via Brevo API, and integrated Gemini API to generate personalized study plans. Onboarded 220+ users.
- Deployed ProStriver using a dual-server architecture (Spring Boot API on AWS EC2 and 5 background jobs on DigitalOcean) with GitHub Actions CI/CD enabling automatic deployment on every push to main.
- Elected Vice President of a 60+ member cloud community, leading AWS initiatives, mentoring members and students on cloud architecture, and increasing active participation by 20% through hands-on AWS Jam sessions and peer-led project builds.

PROJECTS

AI-Powered Crop Yield Prediction | [GitHub](#) | [Demo](#)

Sep 2025

- Built the backend for SIH 2025 (6-member team) integrating a FastAPI ML microservice via RestTemplate for real-time yield predictions across 50+ crop types with 87% accuracy.
- Implemented autocomplete search with JPQL queries and a top-N recommendation engine ranked by predicted yield. Achieved sub-second API response times.

GITAM Aero Astro Club Platform | [Live](#) | [GitHub](#)

Nov 2025

- Delivered 30+ secure RESTful APIs with JWT auth for the official club platform serving 2,000+ students.
- Designed and implemented an admin dashboard enabling user management, role-based access control, and real-time metrics, along with an end-to-end recruitment pipeline, reducing manual admin effort by 70% while maintaining 96% uptime

ACHIEVEMENTS

[Top Performer – Meta Code Quest](#) – Ranked #1 across 5 weekly DSA hackathons, Meta Developer Communities
[Google Cloud Study Jams – Diamond League](#) – 52 skill badges, 48,985 XP across Google Cloud
[LeetCode](#) – Solved 475+ problems with a contest rating of 1645
